DETAILED ACTION

After-Final Arguments

1. Receipt is acknowledged of the after-final arguments filed 10 November 2005, which are considered persuasive.

Allowable Subject Matter

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of Acosta and McMaster fail to specifically teach the optical element of the check-out device, wherein the optical element is constructed and disposed to refract the scanning light beams reflected from the pattern mirrors such that the scanning light beams trace out a scan pattern displaced from the scan pattern that would be traced out by the scanning light beams in the absence of the optical element. Hence the best prior art of record fails to teach the invention as set forth in claims 1-9 and the examiner can find no teaching of the specific check-out device, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in response filed 10 November 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
